Leibniz
Gemeinschaft

The World's Largest
Library of Science and
Technology

EXPERTISE AND SERVICE

In its role as the German National Library for all areas of engineering, architecture, chemistry, computer science, mathematics and physics, the TIB has spent decades successfully meeting the challenge of being an innovative and competent information provider.

On the basis of its superb stock, the TIB today ranks as one of the world's largest specialist libraries, and one of the most efficient document suppliers in its subject areas.

With GetInfo, the portal of science and technology, the TIB provides its customers from the scientific community and from industry with innovative offers and tailor-made comfortable solutions.

50 YEARS OF PROGRESSION AND PROVIDING KNOWLEDGE

Since its foundation 50 years ago, the TIB has evolved into a modern innovative digital library. And thus has more than exceeded its original founding objectives.

GETINFO - GET KNOWLEDGE AND GET AHEAD

With GetInfo, the TIB has created a new dimension in literature searches for specialist subject knowledge of science and technology.

The portal provides access to leading specialist databases, publishing house options and library catalogues. With this, GetInfo offers a worldwide unique stock of technical and scientific specialist information with integrated full-text delivery.

Benefits

- **high quality, specialist information, reviewed by experts**
- **searches more than 135 million datasets – and rising**
- **modern and innovative search engine technology for particularly fast response times and precise search results**
- **depending on demand within 72, 24 or 3 hours or with the Pay-per-View option – instantly to your own workplace**

DOI REGISTRATION AGENCY

The TIB is the first DOI registration agency for worldwide research data. In order to make access to research data easier for the scientific community, the TIB issues Digital Object Identifiers (DOI names).

The registration of a DOI name is the basis for

- **providing clear references and citability**
- **permanent and worldwide access**
- **easy verification and reusability**

Thanks to a new cooperation, leading European research libraries and information centres now also use this TIB service.

The international network aims to

- **guarantee uniform and consistent standards worldwide**
- **increase the level of acceptance for research data as independent scientific entities**
- **ensure adherence to good scientific practice**

Other institutions are welcome to join in this cooperation.
